

**TO: All Muskegon Community College Landscape & Lawn Management Students**  
**FROM: Marcus Duck, MSU Program Coordinator**

Below are key points concerning the MCC Landscape & Lawn Management program. Please pay close attention to these details in order to ensure your success as you progress through the program.

- **MSU Email:** You are required to set up and use your MSU email account. This is the primary method of communication between those of us at MSU and our students.
- **Program of Study:** Students should refer to the program sheet provided to you. The program sheet outlines which MSU and MCC courses are required for the Certificate, as well as which semester each MSU course is offered. **Because MSU courses are offered on a 2-year cycle, they should be scheduled first, and MCC courses should be scheduled around the MSU courses.**
- **MSU Course Locations and Times:** All MSU courses are offered in the Grand Rapids area in the evenings (5:30pm or later). Some HRT 211 and 212 Plant ID labs are held on Saturday mornings each Fall semester. Current classroom facilities for MSU courses are at Kent Career Technical Center and Calvin College. Students do not have to travel to East Lansing for class. We do not offer courses during the summer semester.
- **Financial Aid:** Students in the MCC L&LM program will apply for their financial aid through the MSU Office of Financial Aid. Financial aid will take into account the total number of credits a student takes by adding together the MSU and MCC credits each semester. A minimum of 12 credits is needed to be considered full-time. If all MSU courses have been completed before all of the MCC courses have been taken, students will need to apply for aid through the MCC financial aid office. **The MSU Program Coordinator MUST be notified before students apply for their aid through MSU.**
- **Tuition:** All MSU courses are billed according to current MSU tuition rates and fees. All MCC courses are billed according to current MCC tuition rates and fees.
- **Transcripts:** Any transcripts sent from MCC to MSU for L&LM students should **ONLY** be sent to: Institute of Agricultural Technology, 120 Agriculture Hall, East Lansing, MI 48824.
- **When to take classes:** Students have 3 options for completing the MCC L&LM program:
  1. Take both MSU and MCC courses at the same time to finish the program in the quickest amount of time. Students also benefit in regards to financial aid since this route allows them to reach full-time status more easily. **This is the best option and the one I stress if your finances and time permit you to do so.**
  2. Take all MSU courses first. This takes much longer to complete the program, and MSU does not offer enough credits each semester in GR for students to reach full-time status.
  3. Take all MCC courses first. This also takes much longer to complete the program.

Please do not hesitate to contact me ([duckmarc@msu.edu](mailto:duckmarc@msu.edu)), Dawn Meredith at the MSU-West office (888-458-6805), or Kelley Conrad at MCC ([Kelley.Conrad@muskegoncc.edu](mailto:Kelley.Conrad@muskegoncc.edu)) if you have any questions.
