European Hornbeam
_Carpinus betulus_ ‘Fastigiata’

Height: 35’
Spread: 25’

Site preferences:
Zone: 5a - 7a
Wet/dry: tolerates drought, heavy soil
Salt: sensitive
pH: 5.0 - 8.2

Ornamental Characteristics: Shape: narrow when young, becoming oval
Other: narrow branching angles
Additional: transplant in spring, somewhat slow to establish from bare root
Pests: Some occasional dieback.
