Honeylocust
Gleditsia triacanthos

Height: 40' - 100'
Spread: 40'

Site characteristics:
Zone: 4b - 9a
Wet/dry: tolerates wet and dry sites
Salt: high tolerance
pH: 5.0 - 8.2

Ornamental Characteristics:
Shape: open, spreading
Other: yellow fall color
Cultivars: 'Halka' (essentially fruitless, zone 4a),
'Shademaster' (high vase shaped canopy, essentially fruitless, zone 3b), 'Skyline' (upright, pyramidal, strong central leader, good fall color, zone 3b)
Additional: transplants easily in spring
Pests: over planting has encouraged severe insect problems in many areas (Honeylocust plant bug, spider mite, borer, webworm).
