Michigan State University has thousands of undergraduate courses, many with open enrollment for any qualified undergraduate. Courses providing background and experience in the areas of business, communication, design, materials, production, and science may be valuable additions to any program. In order to choose wisely, read course descriptions carefully, speak with the instructors, and review the listed texts for the course. **Always check prerequisite, co requisite, and general restrictions before enrolling for any course.**

Each semester many colleges and departments offer Special Topics courses. These courses are usually taught by individuals with specific interests in these areas. Special Topics courses are generally not listed in the catalogue. Ask your advisor about these special opportunities.

Independent Study (HRT 491) is available to undergraduate students interested in developing expertise or experience in a topic not covered by regularly scheduled courses. Students work with a Faculty member to develop project parameters including type and scope of work, timeline and grading criteria.
