STUDENT INTERNSHIP OBJECTIVE: To give a student the opportunity to gain first-hand experience in all aspects of a landscape design/build company including:

- **Landscape Designer's Assistant:**
 - Drawing base plans
 - Site analysis and measurements
 - Understanding estimate development
 - Master plan development
 - Plan presentations and sales
 - Plant locating and tagging
 - Project supervision
- **Foreman's Assistant in projects involving:**
 - Grading and lawn development
 - New plantings
 - Hardscape installations
 - Brick walks / patios
 - Stone walls / steps
 - Lighting

STUDENT INTERNSHIP BENEFITS: Student intern will gain valuable “real-world” experience in the landscape design/build field through daily interaction and job shadowing with experienced, veteran designers and foreman.

- Firsthand look at how a multi-dimensional landscape company operates in peak season.
- Understanding the importance of implementing proper design techniques based upon site conditions, challenges and client wants/needs.
- Understanding the importance of client communication and how to deal with their concerns in a beneficial manner for both the client and the company.
- Experiencing the physical demands of the installation phase and how understanding the proper procedures lead to efficient and cost effective results.
- Learning “project management” and the reasons and rewards of a harmonious relationship between client, designer, foreman and laborer on a project.

REQUIREMENTS: Expect full time seasonal employment. Must be a student of Horticulture, Design/Build, Landscape Architecture or a related field.

WAGES: To be determined based on experience and background.
