---

I apologize, I am unfamiliar with this process. Please let me know if you have any questions. We have almost 2 acres with buildings and need a landscape plan with some maintenance over the 2010 gardening season. We have a challenge because we have many black walnut trees on the property. We have made our own attempts at landscaping and have been unsuccessful. Of course all of this also depends on the cost and we may have to put the plan in place in stages. We would like help with the maintenance for the first season and training on how to care for it on our own.
