

Biological Pest Control / IPM Technician

We are an expanding company supplying the horticultural industry in Canada, the Midwestern and Northeastern USA. We are looking to fill positions in our sales / technical department. Our client base includes greenhouse vegetables, greenhouse flowers and golf courses. Products and services include plant nutrition, integrated pest management, and greenhouse vegetable seed development.

Job Highlights

- **Technical support for greenhouse biological pest management and IPM programs**
- **Based in the Midwestern or Northeastern USA**
- **Sales Activities**
- **Customer relationship management**
- **Implementation of product demos and trials**
- **Evaluation of new technologies**
- **Answer questions concerning product performance and rates**
- **Frequent travel**

As part of a rapidly evolving industry, employees are provided with many opportunities to acquire new and unique skills and subsequently demonstrate them in a dynamic workplace.

We are seeking aggressive and self motivated individuals, to develop long term careers in our organization.
