I have a 2 acre garden in East Grand Rapids that is well known but private. I have had a full time gardener for years that is moving on to other things. I need 60hours of help per week. I need someone available to work Saturdays and Sundays . I thought an internship would be a great idea because I have had many interns at Merrill Lynch over my 35 years. The interns must be willing to work 20 hours a week. I have been aware of your great horticulture program and have been involved with Dr. Rappale and the new medical school so I thought a paid internship would be a great opportunity. Intern must have plant knowledge of annuals and perennials. Work starts end of April with 50,000 bulbs and goes to October when we close the garden. I also have a large orchid collection and greenhouse. No lawn work, I have that done. My garden has been featured on Rebecca's Garden Show, Detroit Free Press and Grand Rapids Press, and I have done many fund raisers in garden.

I am in Grand Rapids this week and then return to Florida for a month. Look forward to hearing from you.
