All,

If anyone is interested, please contact Don Russell at don@xeroflora.com. XeroFlor America is a green roof company that grows prevegetated green roof mats. It is their system that is on the roof of the Plant and Soil Sciences Building.

Brad

Hi Brad -

We are in the process of closing down our Milan operations this fall. We are unable to utilize any of the mats currently there because they are in terrible shape. So, we are going to ship a truckload to Clayton's ranch in Durham and another load will go to our grower, Bruce Johnson, in Wisconsin - for rehab.

We were wondering if any able-bodied students might be interested in \$10/hr to roll and load mats on pallets?

Our tentative game plan is to start this activity on Saturday, October 2 and conclude the rolling operations on Sunday, October 3 if necessary. Or the XFA crew can manage things on Saturday and the MSU gang can just come out Sunday. We will provide lunch as well.

Thanks!
Don Russell
