## 2011 Summer Internship Landscape Architecture

Agro-Culture Liquid Fertilizers is a manufacturer and marketer of liquid fertilizers based in St Johns, MI (about 30 minutes north of the capitol city of Lansing, MI). The company operates three manufacturing locations in the US and distributes their fertilizers throughout the United States and Canada. The company also owns a 460-acre research farm near St. Johns, Michigan Agro-Culture Liquid Fertilizers is currently seeking to fill a summer internship position in the area of Landscape Architecture. This person will be based near the corporate office in St. Johns, MI (to assist in the design, establishment and maintenance of the landscape for various corporate facilities in this area.

This position will provide a number of learning opportunities:

1. Design and aid in the establishment of landscaping for the companies new manufacturing facility located on a 13 acre parcel of land in Ashley, MI
2. Update the current landscaping at the North Central Research Station (corporate research farm) as well as design and establish landscaping round several new facilities which will be built at the facility this spring.
3. Work with various supplier and venders to purchase and properly install all necessary materials for these landscaping projects.
4. Opportunities to work independently as well as occasional management of summer staff for the establishment of the above projects will also be available.
5. Interaction with various research, sales and marketing personnel for Agro-Culture Liquid Fertilizer from across the country

This position involves outdoor type work, therefore, plan on getting dirty and maybe a little sunburn. An ability to operate some farm machinery and small equipment is necessary.

This internship will start as soon as possible in the spring (early May) and will run through mid-August. Hourly wage will be determined based on qualifications. Most weeks will be 40-hours (8:00 am – 5:00 pm).

If coming from out of state, we are willing to assist the intern in finding living arrangements. Because St. Johns is a smaller town, more housing opportunities are also available in the Lansing area. Additionally, the projects for this internship are located on two different properties; therefore a car will be needed to drive to and from work.

This position offers practical applications of design and establishment of commercial landscape. The successful candidate should experience a good learning opportunity and practical experience for a student desiring to work in commercial landscape industry after graduation.
