To: Marcus Duck <duckmarc@msu.edu>

East Lansing residence (walking distance to campus, downtown) seeks student(s) for landscape redesign and implementation in a small (50 x 80') shady lot. The project will require four major components, each of which could be taken on separately:

- (1) identification of overall landscape theme incorporating natural elements, wildlife, water features, native species, and recreation for children and development of site plan;
- (2) excavation and replacement of ~375 cu ft soil in preparation for foundation repair (repair done by homeowner).
- (3) selection and installation of plant material and irrigation
- (4) leveling and repair of flagstone patio

This will be a good summer opportunity for a student or a small team of student(s) ready to work independently, and wanting to try fresh ideas or get their feet wet in a relatively forgiving setting. Members of PLANET team encouraged. For details text 517-775-5218 anytime or call 517-351-9497 evenings/weekend

Thanks,
Steve
