

Research Aide:

Needed immediately for the rest of the semester for 2-5 hrs/wk for an independent project developing optimal conditions for screening *Phytophthora* on cucumber fruit. If interested (not required), this job would extend into the summer for 30-40 hrs/ week. The summer work would include maintaining field plots and continuing the disease screening, taking care of the greenhouse and lab duties including stocking, dishes, autoclaving, etc. If interested contact Sue at hammar@msu.edu.
