Wildtype Native Plant Nursery in Mason MI will be adding a few people to our staff in 2011. Wildtype grows exclusively species native to Michigan. We grow about 250 species, including perennials, trees and shrubs, and emergent wetland plants representing the state's diverse flora. These positions will start in March and can be part-time until the semester is over. This is an opportunity to combine horticulture with ecological restoration. If you are looking for an internship for 2011 or are looking for a job after graduation, please email your resume to [wildtype@msu.edu](mailto:wildtype@msu.edu).

Please visit our website at [wildtypeplants.com](http://wildtypeplants.com) to learn more. You will also be able to download a catalog.
