Overview: Part-time, hourly student research assistant position is available immediately in Tom Fernandez’s program in the Horticulture Department. Job duties include maintaining outdoor nursery plants, assisting in setup of research plots and collection of data. Work schedule will be planned around class schedule, 10~ 20 hours per week depending on the work load. Working location will be at the greenhouse on campus and Horticulture Teaching and Research Center. A research project could be developed for students interested in research as a career.

Compensation: $9/hour.
