We are searching for a bright, self-motivated person to work as an **Assistant Manager in the Propagation/Growing Department at Spring Meadow Nursery**. We produce rooted liners (starter plants) asexually from cuttings taken on-site. This is a fast-paced, hands-on position.

- Assist manager in preparing cutting lists for the crew, to meet production schedules.
- Monitor unrooted cuttings under mist. We currently use QCOM environmental computer system.
- Input and maintain correct inventory in company database.
- Recognize and control pest and disease problems.
- Develop and maintain a watering schedule after plants have moved from mist.
- Monitor and make recommendations for correct fertilization application.
- Maintain and repair equipment and facilities used in production.
- Apply Lean manufacturing principles to maintain or improve efficient work processes.
- Weekend, evening and holiday responsibility on a rotational basis shared among other managers and assistant managers.

**Requirements:** Associate or Bachelor’s degree in a plant science-related field. Proficiency in Microsoft Excel and Word. Bilingual English-Spanish skills are highly desirable.

We are located in beautiful West Michigan, five miles from the shores of Lake Michigan. There are many small beachside communities in the area, and we are within 15 miles from Grand Rapids with a population of 200,000.
