We are in need of a farm manager to help us here in Port Austin, MI. We have 25 acres of organic alfalfa in the "transition to Organic" program with the USDA and 2 acres of vegetables in Hoop Houses and adjacent beds. We have a 10 acre forage area we intend to populate with small animals. We are also in the process of acquiring another 40 acre farm next to our current land.

Can you help us find a young motivated person to work our farm?

Thanks very much,

Scott
