Production Specialist
in USA-MICHIGAN-CONSTANTINE

Description

DuPont Pioneer has an exciting opportunity for a Production Specialist to join our company. In this role, you will perform a variety of tasks associated with general plant operations and field activities that will evolve with each season throughout the year. You will be responsible for setting up and monitoring highly automated equipment for various processes such as harvest, conditioning, treating, and packing.

Other responsibilities include, but are not limited to:

- Harvest activities.
- Field management activities such as scouting, field maintenance
- Supervision of field scouting program
- Communicating with Growers, Vendors and Custom Operators.
- Gathering data for future aid in continuous improvement projects
- Various other duties as assigned by supervisor

Qualifications

The following are required:

- Technical two-year degree or equivalent
- Three to five years of on-the-job or related agricultural experience
- Willing and able to work in a variety of areas (field, plant, warehouse)
- Willing and able to climb and/or work in elevated areas; standing and sitting for extended periods
- Willing and able to work both outdoors and indoors in hot, cold, wet and dry conditions
- Willing and able to lift up to 60 lbs. and complete work that involves repetitive motion and/or repetitive lifting
- Willingness and ability to work overtime hours including weekend work required during seasonal peaks
The following are preferred:

- Knowledge of lean manufacturing principles such as 5S, Continuous Improvement and Standardized Work are a plus
- Knowledge of production agriculture and production plant operations desired
- Knowledge of field equipment desired
- Good verbal and interpersonal communication skills
- Teamwork skills
- Knowledge of Microsoft Excel
