Irrigation Designer

We’re seeking someone with good experience in CAD who thrives on details, likes plants, and has a little artistic inclination.

Required Education/Knowledge/Skills:
- Solid CAD experience, and knows his/her way around Sketch-Up, Photoshop, and other graphic software.
- Enjoys working with plants; such as perennials, annuals, vegetables, herbs, and tropical plants.
- Friendly over the phone and verbally confident.
- Ability to explain complex details in simple terms.
- Associate’s Degree in Design, Irrigation Design, Landscape Design, Architecture, or 2 years equivalent experience.

Position Insight:
- Provides design and technical support for LiveWall system designs and infrastructure layout, including quoting projects, and customer support.
- Designs living green walls with system infrastructure and plant combinations.
- Able to quickly and proactively find and solve problems.
- Expresses artistic inclination for plant schematics.

Highlights:
- Full-time career position.
- Hourly pay with commission on projects that you design and quote.
- Benefits include 401(k) with match, paid time off (PTO), medical and dental insurance, short-term and long-term disability, educational reimbursement, Employee Assistant Center, and casual work environment.

Company Focus:
- We care about our earth and one way to improve our environment is through planting more plants, green walls provide us this opportunity.
- LiveWall is a subsidiary of Hortech Inc. specializing in our planted living green wall system.

We are an Equal Opportunity Employer
