Job Description

Job description:

Andy Mast Greenhouses, a rapidly-expanding, family-owned greenhouse production and sales operation in West Michigan, is currently seeking assistant growers. Our current operation consists of three locations with a total of 580,000 square feet of greenhouse space, as well as twenty acres of outdoor production. We specialize in producing high quality potted plants for several of the region’s largest grocery stores. Items grown include: Easter lilies, Poinsettias, Dutch bulbs, Mums, and other annuals.

Job Requirements

Education, training, experience:

The assistant grower's responsibilities include:

- Help determine irrigation/fertility needs of greenhouse crops
- Scout and assist in identifying insects and diseases of greenhouse crops
- Apply appropriate IPM solutions to control problems on plants
- Data collection and entering into crop notes
- Assist in training Greenhouse Techs
- Other duties as assigned

Job Requirements: Education, training, experience:

- Bachelor of Science degree in Ornamental Horticulture or:
- Associate's degree in Horticulture with 1-2 years of growing experience or:
- 3 years of growing experience
- Bilingual in Spanish and English a plus
- Pesticide Applicator license preferred
- Computer skills in Microsoft office and Priva helpful
- Weekends required
