Spray Tech

We are looking for a motivated, team-oriented professional to work as a Spray Technician. This is a challenging year-round position requiring a desire to work outdoors, knowledge of plant I.D., pests and diseases, as well as practical experience in spraying, fertilization and IPM.

You will be applying control measures and fertilization applications to trees and shrubs on our commercial maintenance properties. As a PHC you will scout, diagnose, treat sites and provide feedback to your project director on pest populations, disease stresses and plant health.

Essential Functions include:

- Applying fertilizers and pesticides to plant beds according to schedule, safety procedures, and label instructions
- Driving company vehicle to customer locations
- Responding on a timely basis to customer requests
- Completing required production forms and customer instructions
- Performing a daily five-minute, 360 degree inspection of truck and equipment before taking the vehicle out on the road and upon return
- Maintaining vehicle and equipment cleanliness, safety, and general maintenance
NOW HIRING
