Propagation Grower

DGI Propagators, Hudsonville MI

DGI is quickly becoming a leader in growing and distribution of young plants in the Midwest. We are in need to add a full time grower to continue and improve on the high standards already set in place for the continued growth of our business.

Responsibilities include but are not limited to...

- All aspects of watering and fertilization
- Scouting of pests and diseases
- Pest management via Biological controls and pesticides.
- Disease management
- PGR applications applied when required
- Maintain growing records of all crops
- Ensure all plants meet the quality requirements along with the scheduled ready dates
- Maintain appropriate stock on all chemicals and fertilizers
- Must be able to maintain a clean greenhouse environment

Job Requirements

- Degree in Horticulture and or 2-5 years of growing experience
- Proven propagation experience, but not necessary
- Argus environmental system experience a plus
- MI pesticide license required within 3 months of starting
- Strong communication skills
- Must be a team player
- Computer skills in excel and word
- Ability to work in a fast pace environment
- Must be able to work long days and weekends in season
- Able to maintain and repair growing equipment, such as sprayers and injectors
