Plant Assistant Position: Friesen Lab (PLB)

The Friesen Lab is seeking a motivated, organized, detail-oriented individual to assist with large greenhouse experiments exploring the rapid evolution of mutualisms in two species of Medicago. Duties will include experimental set-up of plants with beneficial microbes, plant maintenance and data collection, harvesting, data entry, and record-keeping. Opportunities for independent side projects and data analysis are available. Minimum 10 hours/week, scheduling is flexible.
