NURSERY AND FIELD RESTORATION POSITIONS AVAILABLE FOR 2015 FIELD SEASON

Wildtype Native Plant Nursery in Mason MI is looking to fill several positions in our nursery and restoration field staff this season starting in mid March and running through at least September 30. The nursery positions involve transplanting, watering and weeding and will require working at least one weekend day per week.

We would also like to add one person able and willing to work both at the nursery and off site. Working off site in the field is physically demanding and requires working long hours and sometimes require overnight trips (expenses paid by Wildtype). A pesticide applicators licenses in required but can be obtained. Skill with the safe operation of a chain saw and plant ID skills also required but can be taught on the job.
