Leppke Landscapes, Nursery & Greenhouses

Leppke Nursery is a 46 year old family owned and operated business in Livingston County that continues to grow yearly. We are a full service landscape design, install and maintenance business that sits on a 7 acre fully run commercial green house, nursery and bulk supply yard.

We are offering paid internships for multiple different areas of our business including care and maintenance of plants, trees and shrubs while working directly with customers helping them find what suits the needs of their landscape space. We are also looking for individuals looking to gain field experience in landscape install, furthering their experience and knowledge in landscape design as well internships for those looking to further their knowledge of grounds maintenance.

Qualified applicants for the onsite internship will have plant, tree and shrub knowledge as well as pesticide and fertilizer application knowledge. Interns will spend an average of 20 to 40 hours weekly (hours can vary to meet an applicants needs) working with the greenhouse and nursery yard learning the ins and outs of running a full service landscape business with a direct hands on approach.

At the end of this internship, you will have a strong understanding of multitasking in the sales industry of greenhouse and nursery production to the general public. You will have a great understanding of the kinds of things customers are looking for and why. You will be working with a team to understand the needs of plants, trees and shrubs in terms of moisture, growth, pest management, fertilizing and marketing.

Field internships will offer higher pay, and an average of 20-50 hours a week. These individuals will be working directly with designers, and field managers to understand what it takes to implement a design from paper to landscape. This internship will provide the kind of experience a designer needs to properly understand and meet the needs of differing situations when applying designs to the actual earth. From proper plant and tree placement, to soil types and unforeseen ground issues.

Grounds maintenance internships are also available to those looking for hands on experience in fertilizing and pesticide application, light landscaping, and lawn maintenance.

Leppke Landscapes also offers full time employment to qualified individuals.

Please email your resume and references to lindsayleppek@hotmail.com, by March 15th. Employment will begin in May.
