Join the Mosquito Joe team! Mosquito Joe provides services to make outside fun again for our customers. We provide mosquito control services to residential and commercial customers, repelling and killing outdoor pests such as mosquitoes, ticks and fleas. Our technicians are trained mosquito control experts who travel to customer homes to apply barrier spray solutions that keep their yard mosquito-free for 21 days, or install misting systems, which offer a more permanent solution. We also provide services for special events to keep guests chatting and laughing instead of scratching and slapping.

The Mosquito Joe Technician job is a part-time, seasonal position taking place during the active mosquito spray season, typically from late April - October. Typical spraying/work hours range between 7am - 7pm, Monday - Saturday. The number of hours worked per week varies by technician and may be anywhere from 15-40 hours, depending on technician preference and availability.

Technicians spray customers' property according to the Mosquito Joe policies and procedures. They are knowledgeable of all Mosquito Joe services and policies and fully communicate to customers the expectations, procedures and tips applicable to the service being provided.
