Roger’s Nursery Inc. Store Manager

Roger’s Nursery is a family owned nursery established over 40 years ago. We have multiple garden centers in the northeast part of Michigan and we are seeking a store manager for our AuGres location. We are located in vacation destinations leading to our seasonal employment opportunities.

Job focus includes:

- Retail Sales: Strong focus on sales.
- Maintenance of yard including watering, display designing, and customer assistance.
- Daily operation of sales with nightly deposits.
- Customer interaction through face-to-face, phone and social media.

Qualities that lead to a great employee

Our nursery is a seasonal business that is very dependent on our employees. Reliability is a key component to making our staff excel. Our focus is on our plant material which leads to us spending our time outside in our yard rather than in our store. This means we are on our feet outside every day. We seek individuals that can handle some physical work and are still eager to learn. In our fast paced business, those who can handle the stress of the spring with the self-motivation throughout the summer thrive.

- Outgoing personalities that can relate with people.
- Reliability with a focus on customers.
- Efficient in time management and handling stressful situations.
- Willingness to learn and continue growing in this industry.

Position includes

- Seasonal employment from April thru October (summer opportunities exist).
- Full-time position with hourly pay rate and additional bonuses for goals.
- Weekends are essential with 6 day work weeks thru July 4, then 5 day work weeks thereafter.
- Opportunities to continue growth in this industry thru marketing and landscape design.

If you are looking to begin your career or grow your career in our green industry and would like a great opportunity, please email Jason Andrzejewski at nurseryhelp@hotmail.com. We are excited and eager to add to our family!
